MONTHLY FEATURED GREEN PRODUCTS

Titebond Green Choice Subfloor Adhesive

GREENchoice Weatherproof Subfloor Adhesive is a professional-strength formula designed for subfloor installations and plywood use. It provides a permanent bond that remains flexible, reduces nailing and helps eliminate squeaky floors.

GREENchoice Subfloor is a VOC-compliant formula containing no ozone depleting chemicals, making it safer for you and the environment. Unlike solvent-based adhesives, it is nonflammable, emits no harmful fumes and cleans up with water.

PRODUCT GREEN CERTIFICATIONS

Titebond GREENchoice Weatherproof Subfloor Adhesive can be used to meet Section 7.1.3 for the National Association of Home Builder Model Green Home Building Guidelines in which it contains low VOC levels to minimize the global impact of home building.

Titebond GREENchoice Weatherproof Subfloor Adhesive is eligible for the U.S. Green Building Council LEED NC Green Building Rating System for New Construction & Major Renovations v2.2 EQ credit 4.1.

For more information on GREENchoice Titebond see the following link: <http://www.titebondgreenchoice.com>

CertainTeed FiberCement Siding

CertainTeed FiberCement Siding is made using a combination of recycled fly ash, Portland cement, wood fiber and specialty additives. The enhanced green formula creates an environmentally friendly, lighter-weight, lower-density product with the most authentic-looking grains and textures of any fiber cement siding on the market. It has a Class A (Class 1) flame spread rating, is impervious to wood-boring insects, resists damaging effects of salt spray and UV rays, will not rot, and consistently outperforms wood siding.

PRODUCT GREEN CERTIFICATIONS

Green Building Standards, including LEED and NAHB. For more information CertainTeed FiberCement Siding on see the following link: <http://www.certainteed.com/resources/FC009.pdf>

Treadlight Flooring

Treadlight™ flooring, trim and windows are made by North Slope Sustainable Wood from small-diameter Western larch – also known as tamarack – trees from forest restoration sites in Montana and the Northern Rockies. Generally, the word “sustainable” refers to wood products harvested from commercial forests that meet certain standards (the “sustainable”) in terms of

“sustainable” refers to wood products harvested from commercial forests that produce a steady, ongoing (thus “sustainable”) yield of wood. Going beyond “sustainable,” Treadlight’s™ harvesting process **restores** the forests of the Northern Rockies to their “old growth” conditions. They do this by culling out overcrowded, small-diameter larch trees to allow the largest and healthiest trees to thrive. They use the small trees with their tight growth rings for a stunning floor with striking honey-and-cinnamon hues, tight, dark knots.

PRODUCT GREEN CERTIFICATIONS:

North Slope Treadlight larch is tracked by Restoration Forestry experts from the forest to your floor and documented with a Natural History of your Treadlight Floor and Trim Certificate.

Treadlight larch flooring can contribute towards satisfying credits under LEED®, NHAB’s National Green Building Program, and other green rating systems.

You can also learn more and see pictures of Treadlight products on the web at <http://www.northslopedwood.com/dealers.html>

Crystal Green-Core cabinets

Crystal’s Green-Core products are made with materials that have a reduced effect on human health and the environment and are a perfect option for the environmentally- and health-conscious. Renewable wood fiber and no added urea-formaldehyde resins are combined in Green-Core by Crystal.

PRODUCT GREEN CERTIFICATIONS

Using Green-Core materials in your kitchen may help qualify your project for points under the recycled content and low-emitting materials sections of prominent green building third party verification systems:

LEED1 — Green-Core cabinetry qualifies as an Environmentally Preferable Product in the revised LEED for Homes.
